Forward Deployed Engineer · Python, SQL & API Integrations · B2B AI Deployment

SUMMARY

Full-stack engineer with customer-facing deployment experience: technical discovery, tailored demos/POCs, pilot scoping, and production go-lives. At Ponce AI, deployed AI workflows across 5+ systems (CRM, comms, ML inference, storage, patient-facing web) for clinic operations. Previously built SQL-backed customer onboarding at Uncountable. Comfortable figuring things out without a playbook — writes integration code, embeds with operations teams, and feeds customer edge cases back to product/engineering.

TECHNICAL SKILLS

Primary: Python, SQL, REST APIs, webhooks · TypeScript, React, Flask, C/C++

Systems: Airtable, Salesforce, Firebase, GCP (Cloud Run), GCS, PostgreSQL, SQLite, Vercel

EXPERIENCE

PONCE AI — Founding Engineer (Forward Deployed)

Dec 2023 – Present

San Francisco, CA

- Led technical discovery and end-to-end deployment at clinic accounts: workflow mapping, data config, API/webhook integrations, pilot scoping with success metrics, and go-live — primary bridge between customers and engineering
- Ran tailored demos and POCs for enterprise partners (Revance, Merz) and onboarding workshops; configured per-account workflows, product catalogs, and scan-backed patient journeys tied to each prospect's sales motion
- Built integration layer connecting 5+ systems: React/TypeScript dashboard, Python scan/AI backend, Airtable CRM, SMS, Firebase, GCS — AI workflows from demo to production at live sites
- Embedded in customer operations to unblock deals: clinic training, scan/SMS configuration, provider routing, and live troubleshooting without a formal implementation playbook

DRIPPI — Co-Founder / Project Lead

Jan – Nov 2023

San Francisco, CA

- Built a React Native mobile app from scratch with a team of 3 (Expo, AWS) — AI-powered outfit generation from market research through launch
- Company was subsequently acquired

UNCOUNTABLE — Full-Stack Software Engineer

Aug 2022 – Jan 2023

San Francisco, CA

- Designed automated customer onboarding tooling to import Excel spreadsheets into SQL databases — reduced manual implementation work and accelerated account go-lives
- Led team of 3 to ship mobile R&D platform in React, TypeScript, and Flask

NVIDIA — Systems Software Intern

May – Sep 2021

Remote

- Revamped GeForce error-handling pipeline in C; built SQLite-backed tracing to internal diagnostics dashboard

ZYYO — Software Engineer

May – Dec 2020

New York, NY

- Built B2B platform (React, Express, PostgreSQL, Salesforce API); integrated external CSV data into client-facing dashboards

PEAKON — Revenue Operations

May – Aug 2019

New York, NY

- Partnered with C-suite to ingest 95K firms into Salesforce; used SQL/Excel analysis to prioritize sales pipeline and ROI-focused targeting

EDUCATION

UNIVERSITY OF PENNSYLVANIA — B.S.E. Computer Science, Minor: Engineering Entrepreneurship

GPA 3.94/4.00, summa cum laude · Coursework: AI, Data Analytics, Statistics, Economics
