Software Engineer · Customer Deployment & Full-Stack Development

SUMMARY

Full-stack engineer who takes B2B products from demo to production in customer environments — integrations, workflow configuration, and go-live. Built clinic-facing AI workflows, REST API integrations, and SQL-backed customer onboarding at early-stage and high-growth B2B companies. Strong communicator: writes integration code, runs customer workshops, and translates operational pain into product requirements.

TECHNICAL SKILLS

Core: Python, SQL, TypeScript, JavaScript, C/C++ · React, Flask, REST APIs, webhooks

Integrations: Airtable, Salesforce, Firebase, GCP (Cloud Run), GCS, Vercel, PostgreSQL, SQLite

EXPERIENCE

PONCE AI — Founding Engineer

Dec 2023 – Present

San Francisco, CA

- Owned end-to-end clinic deployment: technical discovery, workflow mapping, Airtable data config, API integrations, and go-live — bridge between operations teams and engineering
- Built tailored demos/POCs for enterprise partners (Revance, Merz); configured white-label blueprints, product catalogs, and scan-backed patient journeys per account
- Shipped full-stack architecture: React/TypeScript dashboard, Python scan/AI backend, REST APIs (Airtable, SMS, Firebase), and GCS-backed asset storage — AI workflows from prototype to production
- Scoped pilot rollouts with success metrics; embedded in customer workflows via clinic training, SMS config, and live integration troubleshooting

DRIPPI — Co-Founder / Project Lead

Jan – Nov 2023

San Francisco, CA

- Built a React Native mobile app from scratch with a team of 3 (Expo, AWS) — AI-powered outfit generation from market research through launch
- Company was subsequently acquired

UNCOUNTABLE — Full-Stack Software Engineer

Aug 2022 – Jan 2023

San Francisco, CA

- Built automated customer onboarding tooling to import Excel spreadsheets into SQL databases — reduced manual implementation and shortened time-to-value
- Led team of 3 to ship mobile R&D platform in React, TypeScript, and Flask

NVIDIA — Systems Software Intern

May – Sep 2021

Remote

- Revamped GeForce error-handling pipeline in C; traced execution paths via SQLite to internal diagnostics dashboard

ZYYO — Software Engineer

May – Dec 2020

New York, NY

- Built B2B data platform (React, Express, PostgreSQL, Salesforce API); integrated Census Bureau CSV data into ranked deal dashboards

PEAKON — Revenue Operations

May – Aug 2019

New York, NY

- Led exec initiative to ingest 95K prospect firms into Salesforce; analyzed customer data to prioritize sales pipeline

EDUCATION

UNIVERSITY OF PENNSYLVANIA — B.S.E. Computer Science, Minor: Engineering Entrepreneurship

GPA 3.94/4.00, summa cum laude · Coursework: AI, Data Analytics, Statistics, Economics
